CERTIFIED COURSE ON CYBERSECURITY

Cyber Security

Trainer
Mr Mrunal Gadre

Date: 1st To 2nd February 2020

Time: 11 am - 5 pm

Aims & Objectives

A key objective of cybersecurity is to protect information and data from unauthorised access, theft, or damage.

Cybersecurity focuses on deploying measures and technologies that prevent unauthorised access, uphold data confidentiality, integrity, and availability, and reduce the risks associated with cyber threats.

Cybersecurity aims to ensure the continuous operation of business systems by defending against cyberattacks that could disrupt services, operations, or lead to significant downtime.
TRAINING WORKSHOP REPORT

Training Workshop at the Direction of cyber security

Skylark foundation's art science and commerce College Arvi

From 1st *FEBRUARY* .to 2nd *FEBRUARY*. 2000

NATIONAL CYBER SECURITY AWARENESS WORKSHOP

Topics

- Networking & Wifi Hacking Protection
- Social Media Safety & Security
- Phishing Email Fraud
- Financial Fraud Safety
- Digital Arrest Protection

STAY SAFE ONLINE
NATIONAL CYBER SECURITY AWARENESS WORKSHOP

Topics

- Mobile Security and Safety
- Deep fake Or AI Fake
- Online Gaming Safety
- Virus Attack safety
- Cyber Complaint

basic computer workshop   23/01/2023

Activity Report: Basic Computer workshop

Course Title: Basic Computer Skills
Date: 23-01-2023
Duration: 1 to 6 Days
Instructor Name: Mr. Mrunal Gadre
Venue: Skylark Foundation Arts, Science & Commerce College, Khed Shivapur- 412205

Objective: To provide foundational computer skills, including email usage, internet browsing, understanding computer components, and hands-on practical guidance.

Summary of Activities:

1. Email Basics:
Students were introduced to the concept of email communication, starting with creating email accounts on popular platforms like Gmail. The instructor demonstrated how to log in, compose messages, attach files, and send emails. As part of a practical exercise, students practiced sending emails to classmates and the instructor, fostering familiarity with email functionalities.

2. Internet Browsing:
The session began with an introduction to widely used browsers such as Google Chrome and Mozilla Firefox. Students learned to open websites, perform searches using search engines, and utilize browser features like bookmarking pages for future reference. A hands-on activity had students search for specific information and bookmark relevant websites, enhancing their browsing confidence.

3. Computer Components Overview:
This segment focused on providing students with a foundational understanding of computer hardware and internal components. Key topics included the functions of external devices like monitors, keyboards, and mice, as well as internal components such as processors, RAM, and hard drives. The distinction between hardware and software was emphasized, and students identified components in a real or simulated setup.

4. Functions of Computer Components:
Building on the overview, the instructor explained the specific functions of input devices like keyboards and mice, as well as output devices such as monitors and printers. Peripheral devices, including USB drives and webcams, were highlighted for their practical uses.

Students engaged in activities to explore these components within actual or simulated environments.

5. Practical Guidance:
Hands-on sessions were a crucial aspect of the course, where students received guidance on tasks like formatting documents, saving and organizing files, and connecting to and operating printers. The instructor provided one-on-one support to address individual challenges and ensured that each student could perform the tasks independently.

Outcomes Achieved: Students successfully created and used email accounts, demonstrated basic internet browsing skills, and acquired foundational knowledge of computer components. Hands-on activities significantly reinforced their theoretical understanding, and they showed marked improvement in confidence and practical skills.

Challenges Faced: Some students required additional support due to varied levels of prior experience. Initial unfamiliarity with technical terms posed a minor hurdle, which was addressed through tailored explanations.

Recommendations: Future sessions should include advanced topics like cybersecurity and cloud storage. Introducing interactive tools like quizzes and extending the course duration will provide more opportunities for in-depth learning and practice.

Instructor's Remarks: The students demonstrated strong enthusiasm and made substantial progress; with continued practice, they are expected to achieve even greater proficiency.

NAME OF COURSE: Basic Com-puter Skill.

27-01-23 to
28-01-23.
