8	ACTIVITY REPORT:	Skylark Foundation arts Commerce and Science College organized sewage waste water programmed in village. Sewage is a type of waste water that comes from a domestic source like Toilets, seeing showers and washing machines. Waste water is a broader term that includes savage and other types of water that have been used for many purposes including by Industries and commercial Enterprises. NSS student went in rahatwade village and worked on sewage waste water. NSS volunteers visit the village and inform villagers that if not treated properly say which and which water can cause serious environmental damage and health risk to people untreated savage can leak into drinking water sources and contaminants fresh for supplies.waste water treatment removes contaminants so that the water can be refused or disposed of safety. Preliminary treatment. Primary treatment. Secondary treatment. Teritory treatment. Students suggested how to overcome waste-Waste can be overcome by treating it close to where it is produced and the allowing the water to observe into the soil. Student explained very well all things and did very important work for villagers.
9	STUDENT RESPONSE:	Important instructions for villagers How can we help? Don't used the food disposal for kitchen West insted move food scrap to composed pile or throw them away. Don't pour substances like petrol graces, oil pesticides ,herbicides and solvent down sink, storm water drains
